Tanekaha

## Available in 2 different models

### HCPMSA 100:

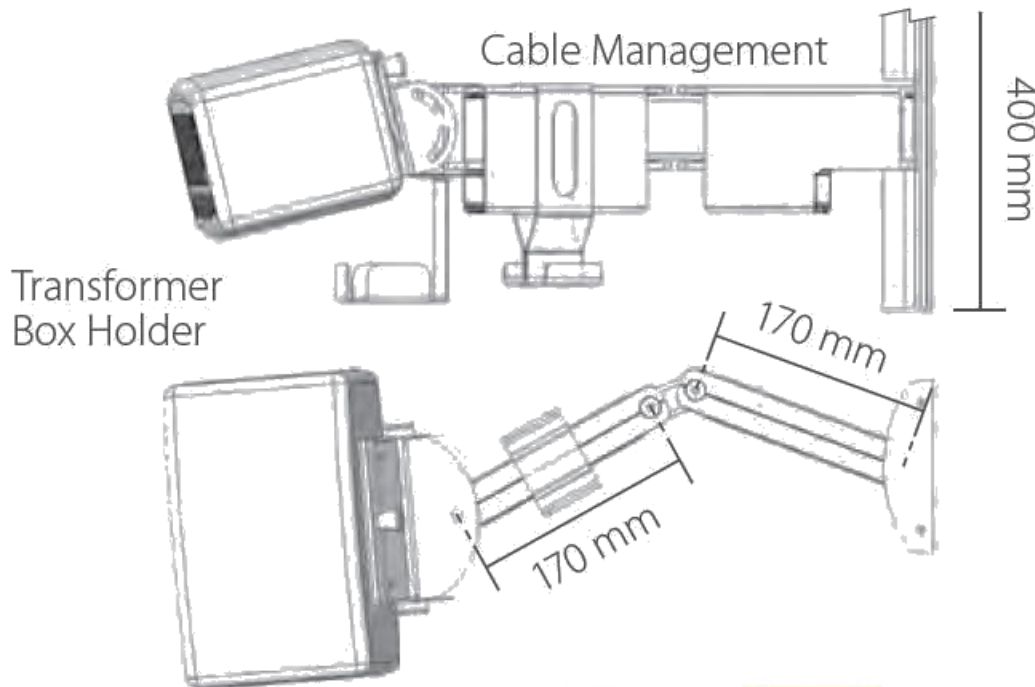

Wall Swing Arm Monitor Display  
Puka

### HCPMSA 150:

Wall Swing Arm Monitor Display  
Tanekaha

## Product overview

- Our wall mounted swing arms are purposely built to safely secure monitors in hospitals and clinics.
- Designed and manufactured in our New Zealand based factory, monitor swing arms can be off the shelf or custom designed by our on-site design team.
- Two standard designs are available; Puka (<12KG) and Tanekaha (up to 20kg).
- The Tanekaha incorporates gas strut technology that allows for effortless adjustment.
- They have a long life, high density, powder coat that complies with medical requirements and are strong, secure and easy to install.
- Added benefits include cable management systems and suitability for earthquake prone locations.
- They are fully assembled and come with an extensive screw kit.
